The test results show that this device meets the FCC rules. Those limits are set to protect residential areas from the devices with harmful emission. This device will produce, use and radiate radio frequency energy. In addition, failure to follow the user's manual to install or use this device might produce harmful interference with radio communication. Notwithstanding the foregoing, it does not guarantee that this type of harmful interference does not occur in some special installations. The interference caused by this device to the reception of radio or television signals may be verified by turning it on and off. Any changes or modifications to this TFT LCD would void the user's authority to operate this device.

Important Recycle Instruction:

 LCD lamps inside this product may contain mercury. This product may contain other electronic waste that can be hazardous if not disposed of properly. Recycle or dispose in accordance with local, state, or federal Laws. For more information, contact the Electronic Industries Alliance at WWW.EIAE.ORG. For lamp specific disposal information check WWW.LAMPRECYCLE.ORG.

Usage Notice

Warning - To prevent the risk of fire or shock hazards, do not expose this product to rain or moisture.

Warning - Please do not open or disassemble the product as this may cause electric shock.

Precautions

Follow all warnings, precautions and maintenance as recommended in this user's manual to maximize the life of your unit.

Do:

- Turn off the product before cleaning.
- Touch screen surface may be cleaned using a soft clean cloth moistened with mild window glass commercial cleaners or 50/50 mixture of water and isopropyl alcohol.
- Use a soft cloth moistened with mild detergent to clean the display housing.

Don't:

- Do not touch the LCD Display screen surface with sharp or hard objects.
- Do not use abrasive cleaners.
- Do not operate the product under the following conditions:
 - Extremely hot, cold or humid environment.
 - Areas susceptible to excessive dust and dirt.
 - Near any appliance generating a strong magnetic field.
 - In direct sunlight.

Introduction

About K17A Series

The K17A Series is a 17" flat panel screen with an active matrix, thin-film transistor (TFT) liquid crystal display (LCD).

Features include:

- Direct Analog signal input
- Active matrix TFT LCD technology
- 1280x1024 SXGA resolution
- 17" viewable display area
- 31.47 ~ 80 kHz horizontal scan
- 56 ~ 75 Hz high refresh rate
- 0.264mm x 0.264mm Pixel pitch
- Auto adjustment function
- Multilingual OSD user controls
- 75 mm / 100 mm VESA mount
- Bracket mount
- K17A Series - Projected Capacitive touch screen with USB controller

Touch Screen for K17A Series

- Projected Capacitive touch screen for finger input only
- Surface: Clear glass
- Interface: USB controller
- HID Multi-Touch: Windows 7
- HID Single Touch: Windows Vista, XP, 2000, ME, 98
- Driver Support: Vista and XP (TUIO), Linux – Certain Platforms, Mac OS 10.5.8 above

Installation

Product Overview

- **Front View**

- **Bottom View**

Attaching the L-Brackets

Depending on your mounting scheme, alternately, you may use the L-brackets to mount your displays onto your wall or device.

Find a suitable location for attaching L-brackets.

- A. The left and right sides
- B. The Top and bottom sides

OR

Note:

You will need a screwdriver to attach the L-brackets.

Your kiosk touch monitor included two L-brackets (and four screws, M4x6).

This equipment is intended to be mounted in accordance with the proper hardware and the installation instructions supplied with the product. Use of mounting brackets or screws other than those specified in the installation instructions may cause a hazard.

Side Mount for Your Monitor

This monitor can be mounted to the wooden or concrete wall with 4 screws and a pair brackets on the opposites.

Connecting the Display (Figure 9.1)

To setup this display, please refer to the following figure and procedures.

1. Be sure all equipment is turned off.
2. Connect the DC adapter to the power connector on the monitor and the other end into an electrical outlet (9.1).
3. Connect the D-SUB cable from the display's VGA input connector to the D-SUB connector of your host computer and tighten the screws (9.1).
4. Connect the USB cable from the USB port of your display to the USB port (9.1) of your computer.
5. Configure the touch screen. Refer to the "Touch Screen Driver Installation" section on page 17.
6. Once the touch screen is configured, the monitor is ready for use.
7. Connect the remote control cable to RJ11 port (9.1) (optional).

Notice!

To ensure the LCD display works well with your computer, please configure the display mode of your graphics card to make it less than or equal to 1024 x 768 resolution and make sure the timing of the display mode is compatible with the LCD display.

We have listed the compatible "Video Modes" of your LCD display in the appendix (on page 16) for your reference.

Don't connect telephone or internet cable to RJ-11 port.

Adapter rating: 12Vdc 3A min., marked with LPS.

Appendix

Troubleshooting

If you are experiencing trouble with the LCD display, refer to the following. If the problem persists, please contact your sales representative or our service center.

Problem: No image appears on screen.

- ▶ Check that all the I/O and power connectors are correctly and well connected described in the “Installation” section.
- ▶ Make sure the pins of the connectors are not crooked or broken.

Problem: Partial Image or incorrectly displayed image.

- ▶ Check to see if the resolution of your computer is higher than that of the LCD display.
- ▶ Reconfigure the resolution of your computer to make it less than or equal to 1280 x 1024.

Problem: Image has vertical flickering line bars.

- ▶ Use “Horizontal size” to make an adjustment.
- ▶ Check and reconfigure the display mode of the vertical refresh rate of your graphic card to make it compatible with the LCD display.

Problem: Image is unstable and flickering

- ▶ Use “FINE” to make an adjustment.

Problem: Image is scrolling

- ▶ Check and make sure the VGA signal cable (or adapter) is securely connected.
- ▶ Check and reconfigure the display mode of the vertical refresh rate of your graphics card to make it compatible with the LCD display.

Problem: Vague image (characters and graphics)

- ▶ Use “Horizontal size” to make an adjustment. If this problem still exists, use “FINE” to make an adjustment.

Warning Signal

If you see warning messages on your LCD screen, this means that the LCD display cannot receive a clean signal from the computer graphics card.

Below are the three kinds of Warning Signal. Please check the cable connections or contact your sales representative or our service center for more information.

No Signal

This message means that the LCD display has been powered on but it cannot receive any signal from the computer graphics card. Check all the power switches, power cables, and VGA signal cable.

Going to Sleep

The LCD display is under the power saving mode. In addition, the LCD display will enter power saving mode when experiencing a sudden signal disconnecting problem.

The monitor can be activated by pressing any keyboard, triggering the mouse or touching the screen.

Out of Range

This message means that the signal of the computer graphic card is not compatible with the LCD display. When the signal is not included in the "Video Modes" list we have listed in the Appendices of this manual, the LCD monitor will display this message.

Touch Screen Driver Installation

The K17A Series is available with USB connection. Touch drivers can be downloaded at www.touchrev.com.

Please Note:

1. The K17A Series is Microsoft® Windows®HID (Human Interface Device) compatible if you use the USB touch screen interface. No additional software driver is required for general operation of the touch screen.
2. For K17A Series, the system requires 15 seconds for Windows 7 to install/uninstall the touch drivers while turning power on/off or plugging/unplugging USB cable.

K17A Series Calibration Instructions:

Calibrating the touch screen in Windows 7:

1. Tap the Start button, Control Panel and then Hardware and Sound.
2. Under Tablet PC Settings, tap Calibrate the screen for pen or touch input.
3. On the Display tab, under Display options, tap Calibrate and then Yes to allow the program to make changes.
4. Follow the on-screen instructions to calibrate the touch screen.
